

***Put Georgia's First Steamroller to
work for you and your cotton!***

Doerun Gin Company is pleased to announce that we have installed the first Steamroller System in Georgia, giving our customers the benefits of moisture restoration and adding value to their cotton.

Using this system, we can safely add up to 15 pounds of moisture or more in each bale of your cotton...that puts more money in your pocket.

For more details on ALL of the benefits of ginning your cotton at Doerun Gin Company, give us a call or stop by and see us.
